Solved Problem Solutions

Chapter Title	Word File	Excel File
Chapter 1 – Introduction	Chapter 1	Chapter 1
Chapter 2 – Linear Programming: Basic Concepts	Chapter 2	Chapter 2
Chapter 3 – Linear Programming: Formulation and Applications	Chapter 3	Chapter 3
Chapter 4 – The Art of Modeling with Spreadsheets	Chapter 4	Chapter 4
Chapter 5 – What-If Analysis for Linear Programming	Chapter 5	Chapter 5
Chapter 6 – Network Optimization Problems	Chapter 6	Chapter 6
Chapter 7 – Using Binary Integer Programming to Deal with Yes-or-No Decisions	Chapter 7	Chapter 7
Chapter 8 – Nonlinear Programming	Chapter 8	Chapter 8
Chapter 9 – Decision Analysis	Chapter 9	Chapter 9
Chapter 10 – Forecasting	Chapter 10	Chapter 10
Chapter 11 – Queueing Models	Chapter 11	Chapter 11
Chapter 12 – Computer Simulation: Basic Concepts	Chapter 12	Chapter 12
Chapter 13 – Computer Simulation with Analytic Solver	Chapter 13	Chapter 13
Chapter 20 – Computer Simulation with Crystal Ball	Chapter 20	

Chapter Supplements

Chapter Title	Word File
Chapter 2 – Linear Programming: Basic Concepts	Supplement
Chapter 5 – What-If Analysis for Linear Programming	Supplement
Chapter 6 – Network Optimization Problems	Supplement
Chapter 7 – Using Binary Integer Programming to Deal with Yes-or-No Decisions	Supplement 1 Supplement 2
Chapter 9 – Decision Analysis	Supplement 1 Supplement 2
Chapter 11 – Queueing Models	Supplement
Chapter 12 – Computer Simulation: Basic Concepts	Supplement

Web Chapters

Chapter Title	Word File
Chapter 14 – Solution Concepts for Linear Programming	Chapter 14
Chapter 15 – Transportation and Assignment Problems	Chapter 15
Chapter 16 – PERT/CPM Models for Project Management	Chapter 16
Chapter 17 – Goal Programming	Chapter 17
Chapter 18 – Inventory Management with Known Demand	Chapter 18
Chapter 19 – Inventory Management with Uncertain Demand	Chapter 19
Chapter 20 – Computer Simulation with Crystal Ball	Chapter 20

Textbook Spreadsheets

Chapter Title	Chapter Folder
Chapter 1 – Introduction	Chapter 1
Chapter 2 – Linear Programming: Basic Concepts	Chapter 2
Chapter 3 – Linear Programming: Formulation and Applications	Chapter 3
Chapter 4 – The Art of Modeling with Spreadsheets	Chapter 4
Chapter 5 – What-If Analysis for Linear Programming	Chapter 5
Chapter 6 – Network Optimization Problems	Chapter 6
Chapter 7 – Using Binary Integer Programming to Deal with Yes-or-No Decisions	Chapter 7
Chapter 7 Supplement	Chapter 7 Supp
Chapter 8 – Nonlinear Programming	Chapter 8
Chapter 9 – Decision Analysis	Chapter 9
Chapter 9 Supplement	Chapter 9 Supp
Chapter 10 – Forecasting	Chapter 10
Chapter 11 – Queueing Models	Chapter 11
Chapter 11 Supplement	Chapter 11 Supp
Chapter 12 – Computer Simulation: Basic Concepts	Chapter 12

Chapter 13 – Computer Simulation with Analytic Solver	Chapter 13
Chapter 14 – Solution Concepts for Linear Programming	Chapter 14
Chapter 15 – Transportation and Assignment Problems	Chapter 15
Chapter 16 – PERT/CPM Models for Project Management	Chapter 16
Chapter 17 – Goal Programming	Chapter 17
Chapter 18 – Inventory Management with Known Demand	Chapter 18
Chapter 19 – Inventory Management with Uncertain Demand	Chapter 19
Chapter 20 – Computer Simulation with Crystal Ball	Chapter 20
